

PRESENTING OUR

NEW PROACTIVE MANIFESTATION.

Best-in-class Packaging & Processing Solutions

Presently *Futuristic*

A New, Double-Dose of Commitment:

For long, NPM Machinery Pvt. Ltd. has been a front line presence in liquid and powder filling line equipments, and a tested & trusted name for 1100-plus Pharmaceutical, Food & Beverage, Agro-Chemical, Cosmetic, Lube & Edible Oil giants across 35 countries.

Recently, in view of the rising needs and expectations of its multi-sector clientele, and the divergent demands of the industry, the company floated a **dynamic new entity under its corporate umbrella - NPM Process Equipment**.

NPM Process Equipment, spearheads the Processing Machinery manufacture. It focuses mainly on Granulation for OSDs, and Auto-Coating Processes, while **NPM Machinery Pvt. Ltd.** leads the Powder & Liquid Packaging Lines Manufacture.

Along with this two-prong restructure, **the company recommitted itself to a new, resurgent paradigm of superior quality, futuristic technology incorporation and more coordinated corporate activity**. And to encapsulate this new avatar and renaissance, NPM also redefined its visual corporate identity.

VISION:

To be the preferred partner of our clientele.

To be the benchmark-setter of the industry.

Methodology: Cultivating complete reliability as a tradition, innovativeness as a culture, and state-of-the-art technology application as a practice.

- Leveraging these values to generate customer goodwill.
- Harnessing this good will to emerge as a significant global player.

MISSION:

To deliver comprehensive, highest quality Processing and Packaging solutions to a diverse clientele, across multiple industrial sectors.

Methodology: Adopting the best industrial practices around the world, investing significantly in R&D, building a highly qualified human talent pool

- Delivering 'products of trust' across the Processing and Packaging value chain.

A No-Holds-Barred Approach to Customer Satisfaction:

NPM Machinery Pvt. Ltd. (formerly known as National Pharma Machinery), began its corporate journey in 2004. Within a short span, it emerged and established itself as one of the frontline presence among India's Packaging Machinery Manufacturers. Today, it is a technology leader, market-mover and change-inducer in the field, offering customized and scalable in-line equipment for applications ranging from Washing, Filling and Sealing to Labeling, Conveying and Inspection.

At NPM is a 150+ strong human talent pool, comprising professionals with refined expertise in engineering, technical service & maintenance, marketing, finance, customer relations, etc., all bonded together with a customer-centric corporate culture.

In light of the recent corporate enhancement (into two individual, but mutually empowering, entities – NPM Machinery and NPM Process Equipment / NPMmach & NPMPro), and further expansion and product development in the pipeline, it is this human asset that will ensure NPM's track record of excellence and steady growth continues into the future.

A No-Excuses State of Readiness:

NPM's two state-of-the-tech manufacturing facilities / assembly shops, sprawling over 60,000 sq-ft, and cocooned in an 85,000 sq-ft premises, are located in Ahmedabad (Gujarat, India).

Its R&D division, a powerhouse of innovation, works in fluid coordination with the Fabrication Section and the Machine Shop, which is empowered with newgen machines and process methodologies. Stringent, stage-wise quality checks render NPM products with greater longevity and optimal utility.

NPM Machinery's current installed capacity enables it to manufacture more than a hundred complete Liquid & Powder Packaging lines every year – from Washing to Labeling to Secondary Packaging Equipment. And when NPM Process Equipment's significant capacity to produce complete granulation and coating lines is added to the equation, it renders the NPM brand a whole new eminence in the field.

NPM's ITeS-savvy administrative and marketing divisions, supported by co-ordination, marketing & sales and services sections, reach its optimal product solutions to all corners of India, and beyond its borders.

Its strong sales and after-sales services, made available to customers round the clock as a matter of faith and principle, complemented by proactive techno-consultancy and know-how-sharing by qualified engineers, have ensured NPM a prestigious, far-flung and satisfied repeat clientele.

Far-flung Acceptance Clientele:

Global Presence:

Product Array:

NPM MACHINERY PVT. LTD.
E2E (End-to-End) Solutions in Packaging:

Pharmaceuticals:

Oral Liquid Syrups
Oral Dry Suspensions
LVPs in Glass Bottles
3-Piece Dropper Vials
External Solutions
Medicated Shampoos / Lotions / Oils
Tablets / Capsules bulk-filling

Cosmetics:

Perfumes & Deodorants
Shampoos, Lotions & Oils
Creams & Gels

Foods & Beverages:

Drinking Water
Hot & Cold Juices
Food Syrups & Sauces
Flavoured Milk

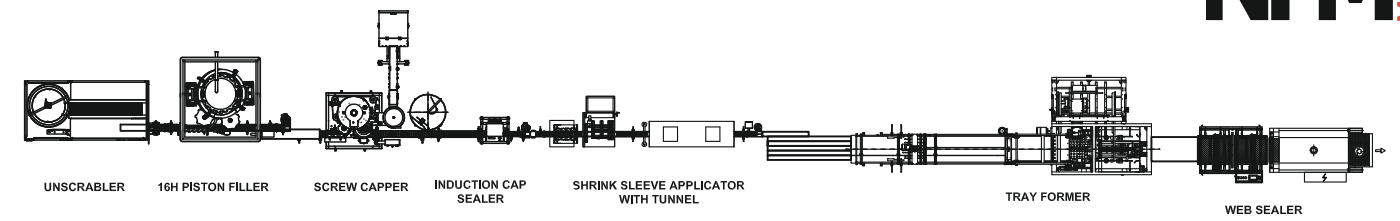

Oils:

All Edible Oils
Lube Oils & Greases

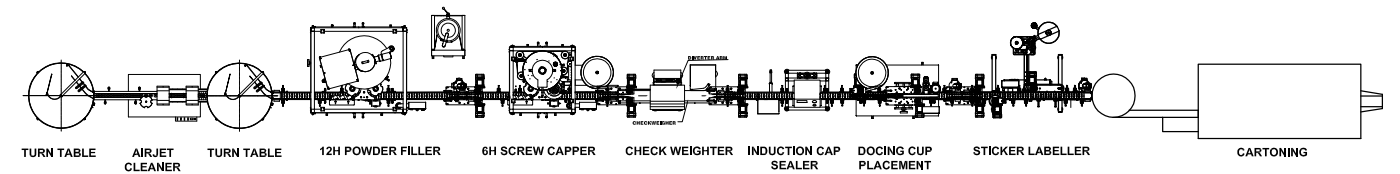

Home Care Products:

Fabric Cleaners
Dish & Floor Cleaning liquids
Toiletry liquids
